Data Justice

Alison Gillwald

Co-Lead GPAI'S Data Justice Project
Executive Director Research ICT Africa
Adjunct Professor University of
Cape Town

Dewey Murdick

Co-Lead GPAI'S Data Justice Project
Director Center of Security and Emerging
Technology Georgetown University

**The
Alan Turing
Institute**

Data Trusts

Neil Lawrence

Co-Lead GPAI'S Data Trusts Project
DeepMind Professor of Machine
Learning University of Cambridge

Seongtak Oh

Co-Lead GPAI'S Data Trusts Project
Vice-President National Information
Society Agency

aapti institute

Our three projects for 2022

DATA TRUSTS

Support the creation of **real-world** data trusts that enable **safe** and **equitable data sharing** for social benefit and **empower** individuals to enact their data rights

DATA JUSTICE

Provide a **framework** for data justice research and practice and include considerations of **justice** in terms of more **equitable access to, fairer representation & greater transparency** in data used in AI development

PRIVACY ENHANCING TECHNOLOGIES

Demonstrate the viability of AI systems in helping achieve the UN SDGs, by providing a means to safely develop, use & share data while preserving privacy, sovereignty, IP rights, & security.

Enabling data sharing for social benefit through data trusts

Enabling data-driven innovation for social and economic benefit, by creating a trustworthy environment for data sharing.

What role do data trusts play in data stewardship?

Re-balancing power asymmetries in data exchanges, by encouraging and empowering the originators of the data to play an active role in setting the terms of data use – and the distribution of the value that creates – and providing a platform for collective negotiation

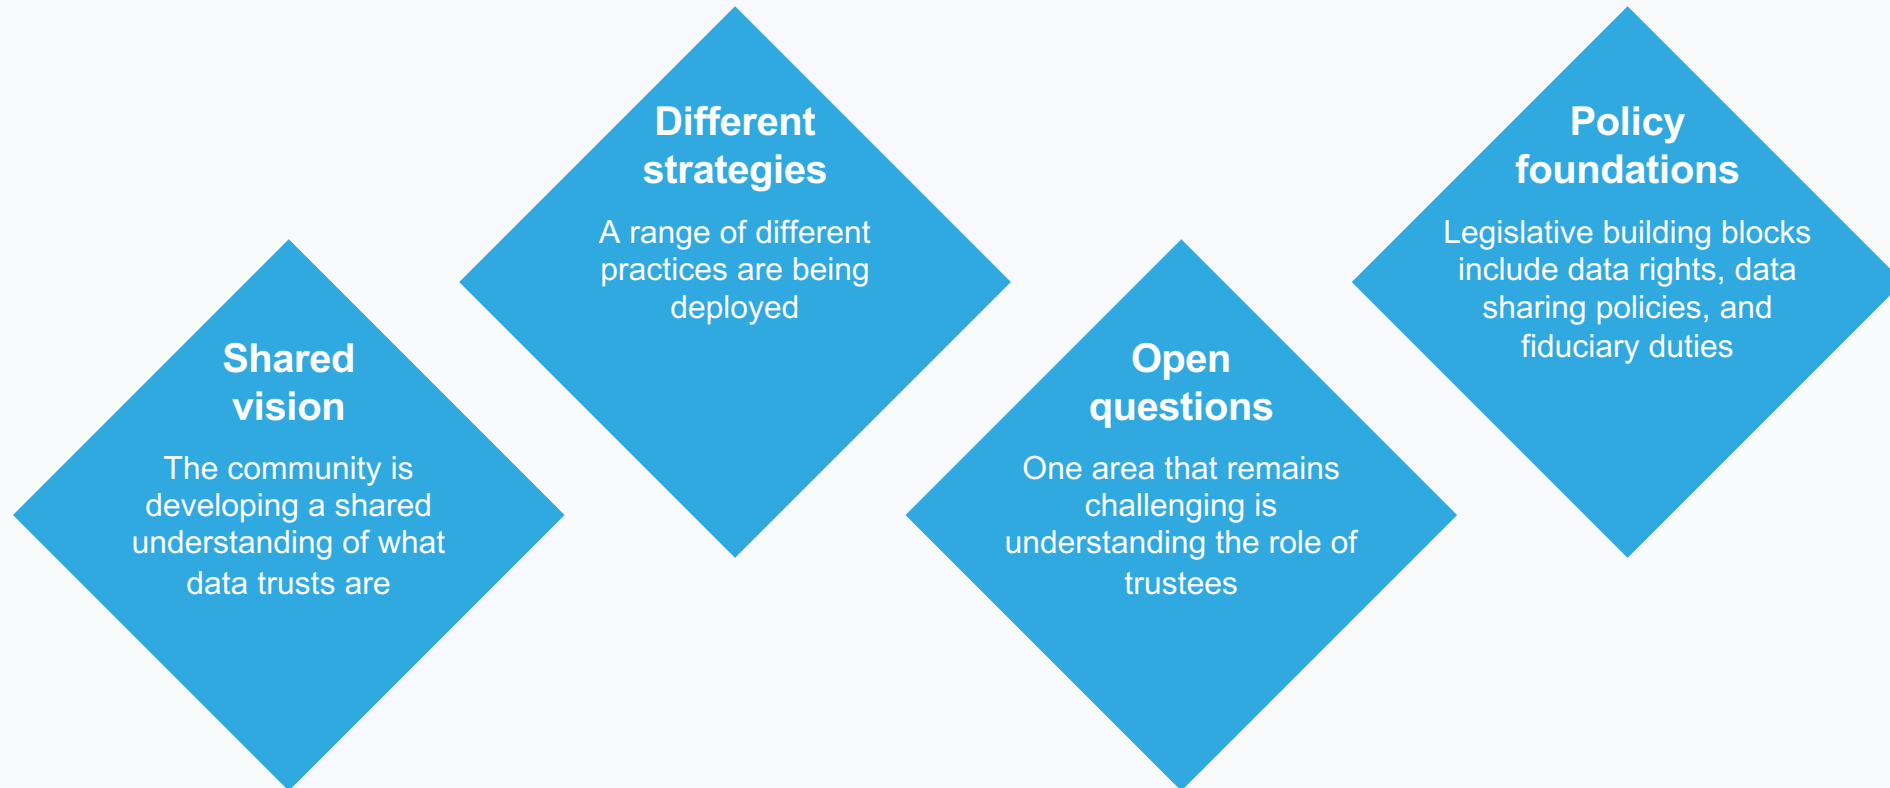

Anticipating, preventing, and managing the vulnerabilities associated with data use, through professional data stewardship.

Functions of data trusts

PLATFORM	provide a platform for collectives to establish desirable terms and conditions of data use
TRUSTEES	appoint expert trustees to take responsibility for the stewardship of the trust's assets
DUTIES	create a regime of strong fiduciary responsibilities to bind the trustees to act in the interests of the trust's members
NEGOTIATION	negotiate use of trust assets in accordance with agreed terms and conditions
SAFEGUARDS	establish safeguards and oversight mechanisms to prevent data misuse and to take remedial action

What have we found so far?

Where next?

**What works,
operationally?**

**What are the policy
implications?**

**How do we support
pilot projects?**

Get in touch!
